

CM2X1024-5400C4

The CM2X1024-5400C4 is a 1024 MByte, two-rank DDR2 SDRAM DIMM designed for extreme speed. This part delivers outstanding performance in the latest generation of DDR2-based motherboards. It has been tested extensively in multiple DDR2 motherboards to ensure compatibility and performance at its rated speed. This memory has been verified to operate at 667MHz at the low latencies of 4-4-4-12. This module is also available in matched pairs of "TwinX" modules tested as a set in a dual channel DDR2 motherboard.

FEATURES

- ▶ 1024 Megabytes of memory in a 240-pin DDR2 DIMM
- ▶ Implemented using 32M x 8 DDR2 SDRAMs
- ▶ 100% tested at 667MHz in high performance DDR2 motherboards
- ▶ Legendary Corsair reliability and service
- ▶ Lifetime warranty

TEST SPECS

- ▶ Each module is tested in an Intel-based motherboard at 667MHz
- ▶ Tested at at the low latencies of (4-4-4-12) at 2.0V
- ▶ SPD programmed at 4-4-4-12 values

The Fine Print: Every part is tested in Corsair's factory at 667MHz, but your actual results may vary depending on the overclocking margin of your CPU and motherboard. Newer motherboards may be used for production test as they become available. Corsair may periodically update the part with newer RAM revisions of same or greater performance. RAM used on the module may change without notice. © August 2004 Corsair Memory, Inc.
